Statistics of Softball Players During 2022 Season
Statistics of Softball Players During 2021 Season

Description

Both of the data sets contain the same variables which are the batting statistics of division 1 softball players in 2021 and 2022.

Format

batting2021 with 2131 observations of the following variables. batting2022 with 2275 observations of the following variables.

Player	Name of the player
team	The team of the player
BA	Batting Average
R	number of runs scored
H	number of hits
HR	number of home runs

Details

The data sets used contain the variables player, team, BA, R, H, and HR. There are two data sets for two different years to compare statistics between players. The worksheet contains small snippets of the full data set used.

Source

The data can be found from the [d1 softball statistics website](#).
